GBA HR1

The popular Global Bill Acceptor, GBA, is a widely distributed and accepted bank note reader, which is renowned for its simplicity, reliability and capacity to accept a wide range of world currencies. The powerful GBA note reader can operate as a standalone, stackerless unit. However, there are integrated stacker options available, to meet particular note storage requirements.

As a result of continual and vigorous product improvement programs, the GBA product range remains at the forefront of BNR technology. In keeping with this mission, the GBA HR1 introduces the latest range of product enhancements to the GBA bank note validator.

Building upon current products, the GBA HR1 is immediately robust and reliable, both in terms of its excellent range of note validation and its sturdy metal housing.

Key features:

- Interfaces including: Parallel, Pulse, Serial, SSP, MDB, ccTalk
- Accepts up to 16 notes, in 4 directions (max note width 82mm)
- Standard illuminated note guide
- FLASH download capabilities
- Optional magnetic head
- Comprehensive GBA Talk software support package
- Range of stylish bezels to suit a wide range of applications
- Simple access to the internal note path

The GBA HR1, together with its stacker options, has wide ranging applications in markets as diverse as carwash change machines to kiosks to specialised AWP solutions.

Support

Backed by dedicated teams of research and development engineers, sales professionals and support staff, the GBA product is our commitment to a vision of product excellence and customer satisfaction.

The Company

Astrosys International Ltd specialises in the design, manufacture and distribution of the Microcoin coin validator and GBA bank note reader. It supports its products with ISO9001 certified manufacturing plants and an international network of offices and market representation in Australia, Hong Kong, the United Kingdom and the USA.
